

**BIOSTL**  
DRIVING ST. LOUIS INNOVATION

## INTRODUCING

# The Early Adopter Grower Innovation Community

*You can call us* **EAGIC**

### FARMER-DRIVEN INNOVATION

We work with farmers, innovators, and researchers to design an on-farm evaluation of a solution for your pain point.

### SOLUTION PROVIDERS

Sourced from GlobalSTL's international network, our solution providers help farmers find a quicker path to adopting new technologies. Think you can solve a problem? We share farmers' needs right out in the open.

### WHO WE ARE

Powered by GlobalSTL - an initiative of non-profit BioSTL - we provide innovative startups with a robust ecosystem to develop their business through expertise, infrastructure, and investment.

Through BioSTL's global innovation sourcing, our GlobalSTL team launched EAGIC to bring **competitive advantage to Midwest growers**. We put farmers' needs first. Then, we go to work finding top innovations domestically and abroad to find solutions that work for you.
